

## Hackensack Golf Club, Oradell, New Jersey

The Hackensack Golf Club rehabilitation included a new expanded ballroom, a new kitchen bar/lounge at the entrance. A new entrance lobby was designed and all public bathrooms were upgraded. Both Men's and Women's locker rooms were completely gutted and provided with new lockers, benches and shower areas. As part of the contract a new mechanical room was added. The Ives Group under the direction of Joel Ives was involved in the project from the initial conceptual design and planning board approvals through to the installation of furniture and finishes. We were the lead design professional orchestrating an Engineer Team, Interior Designers and Kitchen Consultant.
