

## Rahway Railroad Station, Rahway, New Jersey

The Ives Group team was the prime professional for this new station which is influenced strongly by the desire of the community to have a traditional design and by provisions of ADA requirements, repairs and extensions to platforms and canopies. A tunnel was rehabilitated and two new elevators provided. The project required community interaction and coordination with State agencies. A new downtown plaza was generated with a clock tower as a focal point. We design staff conceived the station design when it discovered an abandoned baggage tunnel that was used early in the 20<sup>th</sup> century. Opening up of the tunnel allows the traveler to transverse the tracks at grade level and completely changes downtown Rahway from a city planning viewpoint.
