

Congregation Gates of Prayer-Interior, Metairie, LA

The Ives Group led by Joel Ives, AIA expanded and redesigned the Sanctuary, Social Hall, Offices and Educational Wing of this large reform congregation outside New Orleans. Working closely with the Congregation and its Interior Design Committee, as well as outside artisans, the interior design program resulted in a completely revamped system that meets the congregations current and future needs. Materials were carefully chosen for their beauty and durability, recognizing that the congregation does not have full-time maintenance or the desire to constantly deal with maintenance issues.
