

Historic Radburn Plaza Building, Fair Lawn, New Jersey

After a disastrous fire burned half of the historic Radburn Building to the ground, the building owner retained The Ives Group led by Joel Ives, AIA to spearhead the rebuilding of this community landmark. Included in both the New Jersey and the National Registers of Historic Places, the Radburn Building is the focal point of the historic Radburn Community district, a forerunner in new town planning and cluster development. We are also actively researching original design features and materials, in their effort to restore the Radburn Building to its original beauty. Prior to the fire, Joel Ives designed several interior renovations to the building to accommodate new businesses and building code requirements, while still maintaining the building's character.
