

Chabad Center Study, Florida

The Ives Architectural Studio was asked to develop a study for a Chabad Center in Florida. The design was modeled after the iconic headquarters building of Chabad located in Brooklyn however; our design is in the Mediterranean revival style which fits the local conditions in Florida. The program included worship spaces, multi-purpose classrooms for youth and after school, a rooftop cafeteria, residences for staff, mikvahs for men and women, youth lounge and administrative spaces for the Rabbi and staff. The site work required an outdoor space that could be transformed into a Sukkah as well as a playground and outdoor cooking areas.
