

Hollow Brook Road Kitchen - Tewksbury, New Jersey

The Ives Architecture Studio design won a national award in K+BB (Kitchen & Bath Business) magazine. It was a gut-rehab in a house purchased by our client. The plan was drastically changed by removing all existing walls and finishes. Our staff created a new kitchen space with a skylight and a powder room, breakfast bar, china cabinet and pantry. The kitchen was cantilevered toward the front of the house to expand the floor area without affecting the "wetlands" where the house was located. Ebony cabinets and natural oak wall panels were utilized with a white glass bar and wall units. This project also won an award in "Dream Kitchens & Baths" magazine.
